**Changes to Wattsmart Homes Program in Utah**

As part of the Company’s efforts for continual improvement, Rocky Mountain Power is planning changes to the Wattsmart Homes program in Utah, effective February 1, 2022. Current offerings for Heat Pumps are based on multiple parameters, including climate zones, efficiency rating, and gas vs. electric heat. Some of these heat pump offerings are being adjusted to focus on efficiency ratings with adjusted incentives, as summarized in the Heat Pump tables below. The rest of the tables reflect additional changes, which include incentive adjustments for whole house fans, evaporative coolers, and new construction offerings. **Any incentive amounts for current Program offerings that are not mentioned in the tables below will remain unchanged.** Existing incentive terms and conditions still apply. If you have questions or need additional information, please [contact us](#).
